

# Mohammed Gouse Shaikh

Java Developer | gouseshaikh1999@gmail.com | +91 9594198505

---

## Objective

Attain the position of 'Java Developer' to implement my exceptional software development skills using new and improved technological tools and techniques for the development of the organization.

---

## Profile Summary

- Over 3 years of hands-on **experience** in software development using **Java** technologies.
- Currently working as a **Java backend developer** with strong expertise in Java **1.8, 11 and 17** features.
- Proficient in database management with **MySQL, Postgres** and **SQL server**.
- Extensive experience in API testing using **Postman** and Load testing using **JMeter**.
- Proficient in integrating and managing Apis documentations with **swagger**.
- Experienced in utilizing log management tools such as **Log4j** and **Slf4j**.
- Skilled in managing **Maven** dependencies through **pom.xml** configuration.
- Excellent debugging skills with the ability to identify and resolve complex issues.
- In-depth understanding of **Agile methodology** for project management and software development.
- Strong knowledge of **JDBC** and **Hibernate ORM** for database interaction and mapping.
- Effective team player with **strong communication, presentation, and reporting skills**.
- Proficient in version control systems like **Git** and project management tools like **Redmine** and **Jira**.
- Expert in **Core Java**, including **OOP concepts, String, Arrays, and Collections Framework**.
- Solid understanding of **exception handling**, including designing **custom exceptions**.
- Expertise in Spring frameworks, including **Spring IOC** and **Spring MVC**.
- Proven experience in developing web applications using **Spring Boot**, producing, and consuming **RESTful APIs**.
- Hands-on experience with **gRPC** for building high-performance, scalable, and real-time communication services.
- Proficient in **RestTemplate** and **FeignClient** for making RESTful service calls and inter-service communication.
- Knowledgeable in generating dynamic reports using **Jasper Reports** for business reporting needs.

- Experience working with **multitenant architecture** to develop scalable, isolated solutions for multiple clients within the same application.
  - Hands-on experience with **Hazelcast** for in-memory data grid and distributed caching to improve performance and scalability.
- 

## Technical Skills

- Languages : Java (JDK 8+), SQL
  - Frameworks/Libraries : Spring Boot, Hibernate, Vert.x, Swagger, Jasper
  - Web Technologies : RESTful Web Services, HTML, CSS, JavaScript
  - Tools/Platforms: Git, Jenkins, Azure DevOps, Rancher, Docker, STS, Eclipse, Redmine
  - Databases: MySQL, PostgreSQL, SQL Server
  - Version Control: Git, GitHub, GitLab
  - Testing: Junit 5, Mockito
  - Caching: Hazelcast, Spring boot cache, Caffeine
- 

## Soft Skills

- Team Collaboration : Effectively works within cross-functional teams to meet project deadlines.
  - Communication : Clear and precise communicator with both technical and non-technical stakeholders.
  - Problem-solving : Proven ability to diagnose and resolve software bugs and client issues.
  - Time Management: Skilled in balancing multiple tasks of two projects simultaneously.
  - Team Management: Experience in managing my team as their reporting manager to guide them for their development journey.
- 

## Experience

**Orosoft Technovating Metals | Borivali(E), Mumbai**  
**Software Engineer | January 2022 - Present**

- Developed and integrated RESTful web services for various applications.
- Interpreted project requirements, implemented coding solutions, and performed comprehensive testing.
- Troubleshooted, debugged, and enhanced existing software applications to improve performance and functionality.
- Analyzed programs to identify and implement necessary code modifications based on business requirements.
- Facilitated knowledge sharing sessions to promote team collaboration and technical proficiency.

- Created detailed technical specification documents reflecting current systems and proposed design changes.
  - Managed user requirements and delivered timely project updates to stakeholders.
  - Adhered to the Software Development Life Cycle (SDLC) and Agile methodologies for efficient project execution.
  - Done Code reviews of team members to enhance the application logic and implementing best coding practices.
- 

## Key Achievements

- Reduced API response time by 15% by optimizing database queries and refactoring inefficient code.
  - Successfully resolved WebSocket communication issues between the backend and iOS and Android applications.
  - Contributed to the migration of legacy systems to a microservices architecture.
  - Diagnosed and resolved client-reported issues, improving issue resolution time by 25%.
- 

## Education

Bachelor of Science in Information Technology | Mumbai University | Graduated: 2022

---

## Projects(Personal Project)

E-Commerce Backend API : Designed and implemented RESTful APIs using Spring Boot and Hibernate for an e-commerce application with features like product listing, ratings, products searching, order management, cart management and user authentication and authorization.

---

## Declaration

I, hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
